

WOODHEAD PUBLISHING SERIES IN COMPOSITES SCIENCE AND ENGINEERING

NATURAL FIBER-REINFORCED PLA COMPOSITES

**PROCESSING, CHARACTERIZATION
AND APPLICATIONS**

Edited by
CHANDRASEKAR MUTHUKUMAR
SENTHILKUMAR KRISHNASAMY
SENTHIL MUTHU KUMAR THIAGAMANI
MOHAMAD RIDZWAN BIN ISHAK

Natural Fiber-Reinforced PLA Composites

Processing, Characterization and Applications

Editor-in-Chief

C. Soutis

Series Editors

Bodo Fiedler

Suresh G. Advani

Leif Asp

Chun Hui Wang

The Woodhead Publishing Series in Composites Science and Engineering is a suite of professional reference books providing comprehensive coverage of recent developments in composite materials research for application now and in the future.

Woodhead Publishing Series in Composites
Science and Engineering

Natural Fiber- Reinforced PLA Composites

Processing, Characterization and Applications

Edited by

Chandrasekar Muthukumar

SIMCRASH CENTRE, Department of Aerospace Engineering, Hindustan
Institute of Technology and Science, Padur, Kelambakkam, Chennai,
Tamil Nadu, India

Senthilkumar Krishnasamy

Department of Mechanical Engineering, PSG Institute of Technology
and Applied Research, Coimbatore, Tamil Nadu, India

Senthil Muthu Kumar Thiagamani

Department of Mechanical Engineering, Kalasalingam Academy of
Research and Education, Krishnankoil, Tamil Nadu, India

Mohamad Ridzwan Bin Ishak

Part I Manufacturing

1. Synthesis of PLA, processing, and manufacturing techniques of PLA-based composites with various reinforcements

M. Ramesh, A. Felix Sahayaraj, and M. Tamil Selvan

1.1	Introduction	3
1.2	Overview of PLA	4
1.3	PLA-based biocomposites	5
1.4	Processing of PLA composites	6
1.5	PLA-based composites	9
1.5.1	Leaf fiber reinforced PLA composites	9
1.5.2	Bast fiber reinforced PLA composites	10
1.5.3	Seed/fruit fiber reinforced PLA composites	12
1.5.4	Grass fiber reinforced PLA composites	13
1.5.5	Straw-based fiber-reinforced PLA composites	14
1.5.6	Wood fiber reinforced PLA composites	15
1.5.7	Mineral fiber-reinforced PLA composites	16
1.6	Applications	17
1.7	Conclusion	18
	References	18

2. Additive manufacturing and their influencing factors on the performance of PLA-based biocomposites

Vasu Mallesha and Surjeet Singh Bedi

2.1	Introduction	25
2.1.1	Additive manufacturing	26
2.2	Biodegradable polymers	27
2.2.1	Polylactic acid	27
2.2.2	PLA and its composites	28

2.3	Fused deposition modeling	29
2.3.1	Influencing factors of printing parameters in FDM process	29
2.4	Factors influencing the performance of PLA-based biocomposites	31
2.4.1	Mechanical properties	31
2.4.2	Thermal analysis of PLA materials and its composite	36
2.4.3	Rheological and electrical behavior of PLA	36
2.4.4	Anisotropic properties of PLA	37
2.4.5	Electrochemical and electro discharge treatment on PLA	38
2.4.6	Biodegradable and biomedical AM of PLA	39
2.4.7	Electrically conductive hybrid composite with PLA	40
2.4.8	Optimization of poly(lactic acid) biocomposites	41
2.4.9	Heat treatment on additives of PLA and PLA-CF	42
2.5	Conclusions	43
	References	43
3.	Electrospinning and their influencing factors on the performance of PLA-based biocomposites and bionanocomposites	
	<i>P. Sankarganesh, S.A.O. Adeyeye, and A. Surendra Babu</i>	
3.1	Introduction	47
3.2	PLA in biocomposites in bionanocomposites	49
3.3	PLA bionanocomposites	50
3.3.1	PLA/carbon nanotubes (CNT) bionanocomposites	50
3.4	Influence of electrospin parameters in polymeric nanocomposites fibers	51
3.4.1	Polymer concentration and solution viscosity	52
3.4.2	Temperature	53
3.4.3	Tip-to-collector distance (TCD) and flow rate	54
3.5	PLA Nanofibers in biomedical applications	57
3.6	Future challenges and conclusion	57
	References	61

Part II

Performance characterization

4. Performance of the PLA-based biocomposites and bionanocomposites under dynamic loads

*Lin Feng Ng, Mohd Yazid Yahya,
Sivakumar Dhar Malingam, and
Mohd Afzanizam Mohd Rosli*

4.1	Introduction	67
4.2	Overview of biocomposites	69
4.2.1	Cellulosic plant fibers and their composites	70
4.2.2	Insight into polymer matrices	73

4.2.3	Poly(lactic acid)	75
4.2.4	Interface bonding of plant fiber-reinforced composites	76
4.3	Role of nanofillers on the properties of FRPs	78
4.4	Dynamic properties of biocomposites	82
4.4.1	Fatigue properties of biocomposites	82
4.4.2	Dynamic mechanical properties of biocomposites	86
4.5	Conclusion	88
	Acknowledgments	89
	References	89
5.	Compatibilization effects and influence of natural fiber treatment on the thermal, physicochemical, and mechanical properties of PLA-based biocomposites	
	<i>C.L. Ng and W.S. Chow</i>	
5.1	Introduction	93
5.2	Overview of poly(lactic acid)/natural fiber composites	96
5.2.1	Poly(lactic acid) behavior	96
5.2.2	Natural fiber: The contributing factors	98
5.3	Properties of poly(lactic acid)/natural fiber composites	100
5.3.1	Thermal and physicochemical properties	101
5.3.2	Mechanical properties	103
5.4	Strategy to improve the properties of PLA/natural fiber composites	104
5.5	Future perspective and concluding remarks	110
	Acknowledgments	111
	References	111
6.	Influence of various nanofillers on the thermal, physio-chemical, and mechanical properties of the poly(lactic acid) (PLA) based biocomposites	
	<i>Surjeet Singh Bedi and Vasu Mallesha</i>	
6.1	Introduction	119
6.2	Overview of nanofillers and their types	121
6.2.1	Carbon nanotubes (CNTs) filler	122
6.2.2	Nanocellulose filler	122
6.2.3	Nanoclays filler	123
6.2.4	Nanosilica filler	123
6.2.5	Graphene filler	124
6.3	Effects of various nanofillers on the thermal and physio-chemical properties of the PLA-based biocomposites	124
6.4	Influence of various nanofillers on the mechanical properties of PLA-based biocomposites	132
6.5	Conclusions and future prospects	135
	References	136

7. Synergistic effects of polymer blends on the thermal, physicochemical, and mechanical properties of the PLA-based biocomposites

P. Sankarganesh, A. Surendra Babu, and S.A.O. Adeyeye

7.1	Introduction	141
7.2	Physicochemical and mechanical behavior	142
7.3	Thermal behavior	148
7.4	Key challenges	152
7.5	Future perspectives	153
7.6	Conclusions	155
	References	155

8. Biodegradability, soil burial, and antimicrobial properties of the PLA-based biocomposites and bionanocomposites

Sedat Kumartasli and Ozan Avinc

8.1	Introduction	159
8.2	Biocomposites	160
8.3	Biodegradability	162
8.4	Biopolymers	162
8.5	PLA natural fiber biocomposites	164
8.6	Bionanocomposites	169
8.7	Soil burial properties of PLA-based biocomposites and bionanocomposites	172
8.8	Antimicrobial properties of PLA-based biocomposites and bionanocomposites	175
8.9	Conclusions	178
	References	179

9. A comprehensive review of biofibers reinforced with polylactic acid (PLA) as sustainable socioeconomic composites for futuristic applications

Durgam Muralidharan Nivedhitha and Subramanian Jeyanthi

9.1	Introduction	187
9.2	Plant-derived fibers	189
9.3	Basic structure and components of plant fibers	191
9.4	Various extraction processes adopted in plant-derived fibers	191
9.5	Significance of plant-derived natural fibers as sustainable biocomposite materials in the era of the automobile world	193

9.6	Significance of PLA as socioeconomic, sustainable, and biodegradable matrix material in composites	194
9.7	Conclusion	203
	References	203

Part III

Applications

10. PLA-based biocomposites and bionanocomposites in the biomedical and healthcare applications

Emel Kuram

10.1	Introduction	211
10.2	PLA	212
10.3	PLA-based biocomposites and bionanocomposites	213
10.4	Desired properties of PLA-based biocomposites and bionanocomposites for biomedical and healthcare applications	219
	10.4.1 Super hydrophobicity	221
	10.4.2 Adhesion	221
	10.4.3 Self-healing	221
10.5	Biomedical and healthcare applications of PLA, PLA-based biocomposites and bionanocomposites	222
	10.5.1 Fibers	223
	10.5.2 Meshes	223
	10.5.3 Bone fixation devices	224
	10.5.4 Stress-shielding effect	225
	10.5.5 Piezoelectric effect	225
	10.5.6 Screws, pins and rods	225
	10.5.7 Plates	226
	10.5.8 Microspheres, microcapsules and thin coatings	226
10.6	Conclusions	227
	Acknowledgments	228
	References	228

11. PLA-based bionanocomposites in film packaging applications

*Juliana Botelho Moreira, Suelen Goettems Kuntzler,
Bruna Barcelos Cardias, Jorge Alberto Vieira Costa,
and Michele Greque de Moraes*

11.1	Introduction	237
11.2	Food packaging	238
11.3	Bionanocomposites in food packaging	239
11.4	Advantages and potentiality of PLA bionanocomposites for packaging applications	241

11.5	Economic aspects of PLA production for food packaging	244
11.6	Conclusion and future prospects	246
	Acknowledgments	246
	References	246
12.	Advanced PLA biocomposites for tissue engineering and drug delivery applications	
	<i>V. Parthasarathy, M. Dinesh Babu, P. Senthil Kumar, T. Arivazhagan, B. Sundaresan, and M. Chandrasekar</i>	
12.1	Introduction	251
12.2	Bone tissue engineering applications of PLA biocomposite	253
12.3	Drug delivery applications of PLA biocomposite	260
12.4	PLA biocomposite in other medical applications	262
12.5	Conclusion, challenges, and future perspectives	264
	References	265
13.	PLA-based green packaging materials: The potential of nanocomposite films	
	<i>G. Rajeshkumar and P. Janarthanan</i>	
13.1	Introduction	271
13.2	Biodegradable materials for packaging	273
13.3	Manufacturing of composite films	274
13.4	Characterization of composite films	276
	13.4.1 Barrier properties	276
	13.4.2 Optical properties	277
	13.4.3 Thermal properties	278
	13.4.4 Mechanical properties	280
13.5	Conclusions	284
	References	285
14.	Exploring biodegradability, soil interactions, and antimicrobial activity of the natural fiber reinforced PLA-based composites	
	<i>G. Rajeshkumar and M.C. Aswin</i>	
14.1	Introduction	291
14.2	PLA polymer	292
14.3	Biodegradable reinforcements	293
14.4	Manufacturing of PLA-based composites	294
	14.4.1 Injection molding	295
	14.4.2 Extrusion compression molding	295
	14.4.3 Hot pressing	295

14.4.4	Film stacking	296
14.4.5	Pultrusion	296
14.4.6	Additive manufacturing	297
14.5	Characterization of composites	298
14.6	Conclusion and future perspectives	304
	References	305
